Is solar power the next big thing in airport infrastructure?

We take a look at how solar power is fast becoming the next big thing in airport infrastructure. Melbourne Airport is going to rely on photovoltaic solar panels for up to 20% of its energy demand by 2021. Credit: Melbourne Airport. The aviation industry has long had its critics.

How many airports use solar power?

In fact, there are more than 100 airports making use of solar power generation in some way; some large, others on a smaller scale. However, they are some of the more ground-breaking projects, either because of their size, the technologies and design they incorporated or their ambition to be the first.

Is SolarCity creating solar Islands?

SolarCity was applauded when it announced its plans for solar roofs earlier this year. Now, it appears it is in the business of creating solar islands.

Which US airport has the most solar energy?

Much smaller in comparison, the Tennessee-based domestic airport became the first in the US to receive all of its energy from solar. It claimed the title in July 2019 after years of work, which included three phases of development. It had been working towards the goal since 2011.

Does Kuala Lumpur International Airport have a solar system?

In 2014, Kuala Lumpur International Airport installed a 19MW solar system to provide the airport with 26,000MW hours annually. The system would save \$627,000 annually at current (2014) energy costs, the airport operator Malaysia Airports Holdings Berhad (MAHB) said when announcing its completion.

Will Melbourne Airport rely on photovoltaic solar panels?

Melbourne Airport is going to rely on photovoltaic solar panels for up to 20% of its energy demand by 2021. Credit: Melbourne Airport. The aviation industry has long had its critics. From environmental groups to trade unions, governments to local residents, at some point it has been the object of scorn for one reason or another.
