

What is Uzbekistan's solar energy vision?

It outlines the sustainable energy environment solar energy could deliver and offers a timeline up to 2030. In this vision, Uzbekistan succeeds in maximising the benefits of solar energy capacity for both electricity and heat, making solar energy one of the country's major energy sources.

Will Uzbekistan be able to deploy solar energy by 2030?

After discussing the possible barriers to the deployment of solar energy in Uzbekistan, the report presents a roadmap for solar energy by 2030. It provides examples of international best practices in solar energy deployment from IEA member and association countries.

What is solar energy potential in Uzbekistan?

The solar energy gross potential totals  $2\,134 \times 10^3$  PJ, while technical potential is estimated at  $411.7$  PJ, which is equivalent to almost four times the country's current primary energy consumption (Table 1). Table 1 Renewable energy source potential in Uzbekistan

How to make solar energy a key energy source in Uzbekistan?

The policy and regulatory frameworks enabling further solar energy deployment in Uzbekistan. Increasing power system flexibility to integrate the increasing amount of solar generation. Finally, the recommended actions are a co-ordinated package of measures to implement to make solar energy the key energy source in Uzbekistan in 2030 and beyond.

What is Uzbekistan's solar energy roadmap?

This roadmap primarily focuses on increasing solar generation in Uzbekistan's electricity mix, but also touches upon solar heat potential to reduce its dependence on fossil fuels. The roadmap aims to help Uzbekistan formulate its strategies and plans for solar energy deployment across all levels of government.

Should Uzbekistan decarbonise solar energy?

This roadmap provides a timeline through 2030 with key actions. In addition, in order to further enhance solar energy use beyond 2030 and move progress toward clean energy transitions, the government of Uzbekistan may need to also consider decarbonising other sectors.

Uzbekistan is making strides in renewable energy, aiming to exceed 18,000 MW of solar and wind capacity by 2030, which will enable the country to generate 40% of its ...

This Solar Energy Policy in Uzbekistan Roadmap is part of the EU4Energy programme, a five-year initiative funded by the European Union. EU4Energy's aim is to support the development of evidence-based energy policy design and ...

The first solar photovoltaic (PV) plant, with 100 megawatt (MW) capacity, developed through Scaling Solar Program, is being constructed in Navoi region at the time of publication of this report. World Bank Group's Scaling Solar Uzbekistan Round 2 program aims to add over 400 MW of clean and renewable PV energy to the country's energy mix.

The Project involves the design, financing, construction, ownership, operation, and maintenance of three solar photovoltaic independent power plants representing a combined 897 megawatt (MW) of installed capacity (Samarkand 220MW plant, Jizzakh 220MW plant and Sherabad 456.7MW plant) (the PV plants), and their associated interconnection facilities.
