What is EnerSys Wi-IQ battery monitoring system?

EnerSys introduces its Wi-iQ battery monitoring system which collects performance data for peak battery performance. The EnerSys Wi-iQ battery monitoring system helps you power your battery fleet more productively and profitably.

How does EnerSys Wi-IQ work?

in wireless technology. Installed directly on the battery harness, the Wi-iQ device communicates with remote sensors on the battery to capture and continuously share battery operating data via Bluetooth with all EnerSys battery op

What is a Wi-IQ battery monitoring device?

Cut Total Cost of Ownership (TCO) Optimize battery fleet operations At the core of EnerSys's power management, the latest Wi-iQ battery monitoring device features a slim design for easy installation on the battery harness and combines battery monitoring expertise with the latest in wireless communication.

What is EnerSys Wi-IQ report?

EnerSys has developed its Wi-IQ Report, a customer reporting suite which enables you to keep on top of your battery fleet's performance. You can up-load data from all your Wi-IQ devices and analyse a single battery or compile reports by battery/truck family to assess your utilisation.

What is EnerSys WHQ Wireless battery monitoring device?

EnerSys WHQ Wireless Battery Monitoring Device Improving your productivity and increasing your profits! EnerSys Wi-IQ has the ability to communicate wirelessly to download the battery key information for better diagnostics and service.

How does the Wi-IQ device work?

Along with storing all battery operating data on the device itself, the Wi-iQ device wirelessly communicates with our Truck iQ(TM) smart battery dashboard, our E Connect mobile app, EnerSys modular chargers and Xinx(TM) battery operations management system.

- 1.1. Microprocessor-controlled
- 1.2. Able to auto identify battery's capacity
- 1.3. Able to adapt to State of Charge (SoC) in IONICTM charge profile
- 1.4. Compatible with battery voltages of 12, 24, 36, 48, 60, 64, 72 and 80

At the core of EnerSys power management, the latest Wi-iQ battery monitoring device features a slim design for easy installation on the battery harness and combines battery monitoring ...

controller expected to be mounted on an industrial battery. 2. The assembly has to be made on an open voltage battery in a non-confined place. 3. Input Voltage range : [15Vdc ; 120Vdc] 4. Current measurement range : [-500A ; +500A] 5.

Ottieni il massimo dalle tue batterie. Combinando la nostra esperienza nel monitoraggio della batteria con la recente tecnologia wireless, il dispositivo di monitoraggio della batteria Wi-iQ monitora una serie di dati di funzionamento della batteria, tra cui ampere (AH) di carica/scarica, temperatura, tensione e livello dell'elettrolita (tramite un sensore esterno opzionale).

WiQ-Report is developed by ENERSYS S.A.R.L. The most popular versions of this product among our users are: 1.1, 1.2, 1.3, 2.0 and 3.0. The name of the program executable file is WDM.exe. The product will soon be reviewed by our informers. Share your experience:

The E Connect app is an EnerSys designed smart device application developed by our specialist software engineers. This app connects to our proprietary WiiQ3 & 4 data loggers and iQ / + Modular & COMpact chargers. It allows the user to easily connect, download and analyse battery and charger data through simple bluetooth connectivity. ...

The battery is fitted with a WiQ onboard battery monitoring device. The WiQ is suitable for a voltage range 24V - 80V. These devices capture battery operating data for later reporting and analysis whilst at the same time offer visual warnings to the operator on the current status of the battery - refer table below.

4.7 assemble the plastic clamp on the main unit (torque 1.5nm±0.1) using 16mm long screws. 16mm screws Caution: using inappropriate screws (type and length) may damage the product and impact its reliability.
