

zappi operates like an ordinary EV charging station. myenergi Ecosystem Integrate with your myenergi devices, prioritising surplus generation to power your home, zappi, eddi or, store in ...

Myenergi do allow customers to purchase the optional 8M lead that the V1 came with, if you do wish to do that please speak with our sales team. If you have a V2 Zappi the only way you can get a longer cable and keep the warranty is to have a untethered unit and then you can have as long as you want for a cable.

The myenergi zappi seamlessly connects your electricity supply to your electric car. Once installed, simply plug in your EV and enjoy hassle-free electric car charging from the comfort of ...

MyEnergi's Zappi charging point is a smart EV charger for homes and businesses. It's available in four versions, each of which comes in white or black. Tethered Zappis have a type-two charging ...

How do I find out whether my Zappi is v1 or v2? On the dashboard under my devices it says it is "SN 16114463 · v3560S3.147" but it doesn't actually say what sort of Zappi it is. If I download the technical info it gives a different serial number - "ZAPPI -207TW" but that doesn't say if it is a 1 or a 2 either.

At myenergi we pride ourselves on providing our customers with the highest quality, UK made, EV home chargers. It's only natural that we want to ensure our customers get the best experience when looking to get their zappi installed. ...

MyEnergi's Zappi charging point is a smart EV charger for homes and businesses. It's available in four versions, each of which comes in white or black.

Bei den zappis ist jeweils "Strom Max" auf 15.6A und bei der als Master konfigurierten zappi ist "Netzlinit" auf 50A eingestellt. Soweit also alles prima und jede der beiden zappis funktioniert für sich alleine hervorragend. ...

Just to close off this thread in case anyone is looking in future, I rewired the Grid CT from the Harvi to the Zappi and I can now set the Grid Limit to a maximum of 30kW, so I have set it to 24kW to match the 100A fuse (although I have been told that it will support significantly more for short periods).

I have 3 phase system with following set up: Zappi, each CT on each phase all set to grid Harvi, each CT on each phase of PV/battery input as per the ... myenergi > General > General Discussion > 3 phase zappi eco+ issue. Forum rules. Share. Share with: Link: Copy link. 6 posts 3 phase zappi eco+ issue. 3 phase zappi eco+ issue.

As the Zappi was designed for charging from solar you need to ignore messages like waiting for surplus, without solar it just means wait for the schedule to start. Fast mode means charge ...

4 ???· We're simplifying our zappi lineup. Originally, we offered eight zappi variants: four 7kW single-phase units, available with either tethered or untethered cables in black or white, and four 22kW three-phase models, also available in both cable types and colours.

Zappi versions that do not have the -T suffix comply with EN 61851-1:2019 with the exception of Clause 8.4 in order to meet the requirements of BS 7671:2018 Amendment 1:2020 which requires the protective earth conductor to be switched in order to provide protection against a damaged PEN conductor in a TN-C-S earthed electrical system

I find the Zappi handbook badly written. There are many examples of its versatility but there are many more options on the control panel than are desc. ... Myenergi support will sort it for you I am sure. prawlin. 4,488 2,241. Grand Master. prawlin. 4,488 2,241. Post Aug 04, 2021 #8 2021-08-04T18:39+00:00.

Post 13 minutes ago #1 2024-12-19T22:11+00:00.

Hi I wondered if you are working with Octopus energy to enable the Intellegent octpus service to work with Zappi chargers. I am guessing they are working on only allowing the car to charge in off peak time, and so need additional information to make this happening.

Unfortunately some cars see any repeated charging stop starts as being a possible fault with the charging point (it isn't in this case). So the car ceases to charge until it is reset by unplugging or by unlocking locking etc. Zappi using solar energy on ECO+ will inevitably stop and start as clouds pass over or household loads take priority.

zappi is an AC EV charger, intended to be installed in a fixed location and permanently connected to the AC supply network. It is a Class 1 item of electrical equipment in accordance with IEC ...

The Zappi 2 has been performing happily since the start of the year but has started persistently tripping its breaker after around 30 minutes of charging at 7kW. It does this with both of our cars (a Zoe and e-niro). ... It would be great if someone from Myenergi could chime in here. johnkorr. 12 2. johnkorr. 12 2. Post Sep 30, 2022 #9 2022-09 ...

additional support for 3 phase systems, allowing connection of a single phase zappi in a 3-phase 3-wire supply, and to allow the ECO+ mode to be used on a three-phase zappi with all three phases energised. The

way i read it, this allows the Zappi 1 to be able to be used with 3-phases, which is not possible.
<Confused> Richard

5 ???· The Zappi uses the PWM to indicate to the car how much charge is available and the car decides how much of that charge to use. For a single phase Zappi maximum charge is around 32 amps / 7.2 kW and a PWM of 53% indicates that is available. If the PWM is less than that, then the Zappi is limiting charge.

Bei den zappis ist jeweils "Strom Max" auf 15.6A und bei der als Master konfigurierten zappi ist "Netzlinit" auf 50A eingestellt. Soweit also alles prima und jede der beiden zappis funktioniert für sich alleine hervorragend. Allerdings möchte ich die beiden zappis gerne auch mal gleichzeitig mit dynamischem Lastmanagement (mit maximal 11kW ...

So my untethered Zappi won't recognise my PIN, the cable isn't locked, the symbol is purple. ... myenergi > Products > zappi v2 > HELP! Zappi not recognising PIN. Share. Share with: Link: Copy link. 10 posts HELP! Zappi not recognising PIN HELP! Zappi not recognising PIN. Bjamin79. 8 1. Bjamin79. 8 1. Post Jan 15, 2022 #1 2022-01-15T17:24+00:00.

You should try to get the Zappi v2.1 with Lan/wlan. then the HUB is integrated in the Zappi and you only have to bring the lan with a powerline adapter to the zappi. The only challenge that remains is the Harvi for the ct. This is necessary for the timers! the Harvi is still connected to the zappi at 868mHz. See also here: Communications-Principles

The Zappi Mode is only defined as a Select entity (select.myenergi_ev_charge_mode). It can be changed on a Dashboard but it does not change the status in the App or on the Zappi.; afterward a short period it is reset to the current status. The integration provides Services for boosts but the mode change. I am simply seeking some ...

4 ???· Originally, we offered eight zappi variants: four 7kW single-phase units, available with either tethered or untethered cables in black or white, and four 22kW three-phase models, also available in both cable types and colours.

The project will be running over the next couple of years and we will be recruiting some existing zappi and eddi owners to get actively involved and help us gather data. Hopefully, in the next month, we will be contacting possible candidates. Investing in People. myenergi are proud to recruit locally from their beautiful Lincolnshire surroundings.

I am trying to switch my Zappi to use my new wifi network. I have set the wifi to ON and access point to ON. But I didn't get to try and change the network until the next day.

A couple of days ago I updated my Zappi v1 but I encounter several problems. This is the first picture I'd like to start with. Maybe this is not related to the update, but this is the 3th time since the update this is on the display and of course, Zappi and Harvi are red on the Hub.
